Is your school on the Hit List?

Since 2004 over 70 schools have been closed and nearly 10 percent of all CPS students now attend Charter Schools. In addition over 2000 experienced teachers have lost their job even though charters on average perform worse than traditional neighborhood schools.

Your School could be next :

**Has your school ever been on
probation?**

**On a Turnaround List? Chastised for
low test scores?**

*Join a committed group of teachers,
community activists, parents and
students to provide an alternative to
the destruction of our school
communities. Get involved before the
next round of attacks on public
education leaves you at risk!*
